

WE MAKE CLEAN ENERGY HAPPEN®

# Temporary Maintenance Project

## Maintaining Safety and Reliability

### ABOUT THE PROJECT

This work is a temporary maintenance activity being performed by Williams, the operator of the Transco interstate natural gas pipeline system. The work involves Mainline B, a segment of the Transco system—one of the nation’s largest natural gas pipeline networks. **The State of Maryland is not conducting or directing this work.**

### WHY THIS PROJECT MATTERS

- Supports compliance with federal pipeline safety requirements
- Part of Williams Integrity Management and Process Safety Management programs
- Helps ensure the continued safe and reliable operation of existing energy infrastructure

### PROJECT LOCATION AND ACCESS

- A segment of Transco’s transmission system adjacent to Gunpowder Falls State Park
- Limited, temporary use of a portion of the Torrey C. Brown Rail Trail for project access

### PROJECT ACTIVITIES AND DURATION

- Excavation of a portion of the pipeline to allow for routine inspection and examination
- Restoration of affected areas in an environmentally responsible manner
- Temporary work expected to last approximately 30 days
