

## Common Questions and Topics of Interest

---

# 8

### Why are there backup alarms and truck noise?

Backup alarms and safety equipment are required to protect workers and the public. While they can be disruptive, they are an important part of maintaining a safe work environment.

# 9

### Why has there been increased traffic?

Construction requires moving materials, equipment, and crews, which can increase traffic. We are working to manage traffic and reduce impacts.

# 10

### Why are water trucks in the area?

Water trucks are used to support construction activities, including dust control and site management, which helps reduce environmental impacts during work.

# 11

### What is being done about delivery drivers and speed concerns?

We take this concern seriously. Expectations are communicated to contractors and drivers regarding safe speeds and responsible driving in residential areas. Reports of unsafe behavior can be reported to [outreach@williams.com](mailto:outreach@williams.com).

# 12

### When will ditch digging occur?

Ditching is a separate phase of construction that will follow current work. Timing will be shared as schedules are finalized so residents have advance notice.

# 13

### What is the plan for cleanup and debris removal (including from tree cutting)?

All construction-related debris, including materials from clearing activities, will be addressed as part of project cleanup. Disturbed areas will be restored in accordance with project plans and applicable requirements.

# 14

### How is Williams keeping residents informed?

We understand the importance of clear communication and are working to provide timely updates on construction activities, schedules, and expected impacts. Residents are encouraged to reach out with questions or concerns at any time by email at [outreach@williams.com](mailto:outreach@williams.com).
