Williams WE MAKE CLEAN ENERGY HAPPEN®

Kelso Beaver Reliability Project

Strengthening energy reliability through access to storage

ABOUT THE PROJECT

The proposed Kelso Beaver Reliability project is designed to strengthen the reliability and resilience of the Northwest Pipeline system by improving access to North Mist Storage. The project would add approximately 183,400 dekatherms per day of firm transportation capacity, bringing total pipeline capacity to approximately 384,400 dekatherms per day, through existing infrastructure upgrades and a new electric compressor station.

BUILDING FLEXIBILITY TO SUPPORT REGIONAL RELIABILITY

- **Adds firm transportation capacity in both directions**
- **Improves access to North Mist Storage**
- **Helps the system respond to volatile winter demand**
- **Uses existing pipeline infrastructure**
- **Requires NO NEW pipeline construction**
- **Uses electric compression**

ENHANCING INFRASTRUCTURE. DELIVERING ENERGY. TRUSTED PARTNER.

183,400 Dth/d
added capacity

131,000 Dth/d
eastbound service

52,400 Dth/d
westbound service

0 miles
of new pipeline

LOCAL ECONOMIC BENEFITS

~$6.8M
total economic impact

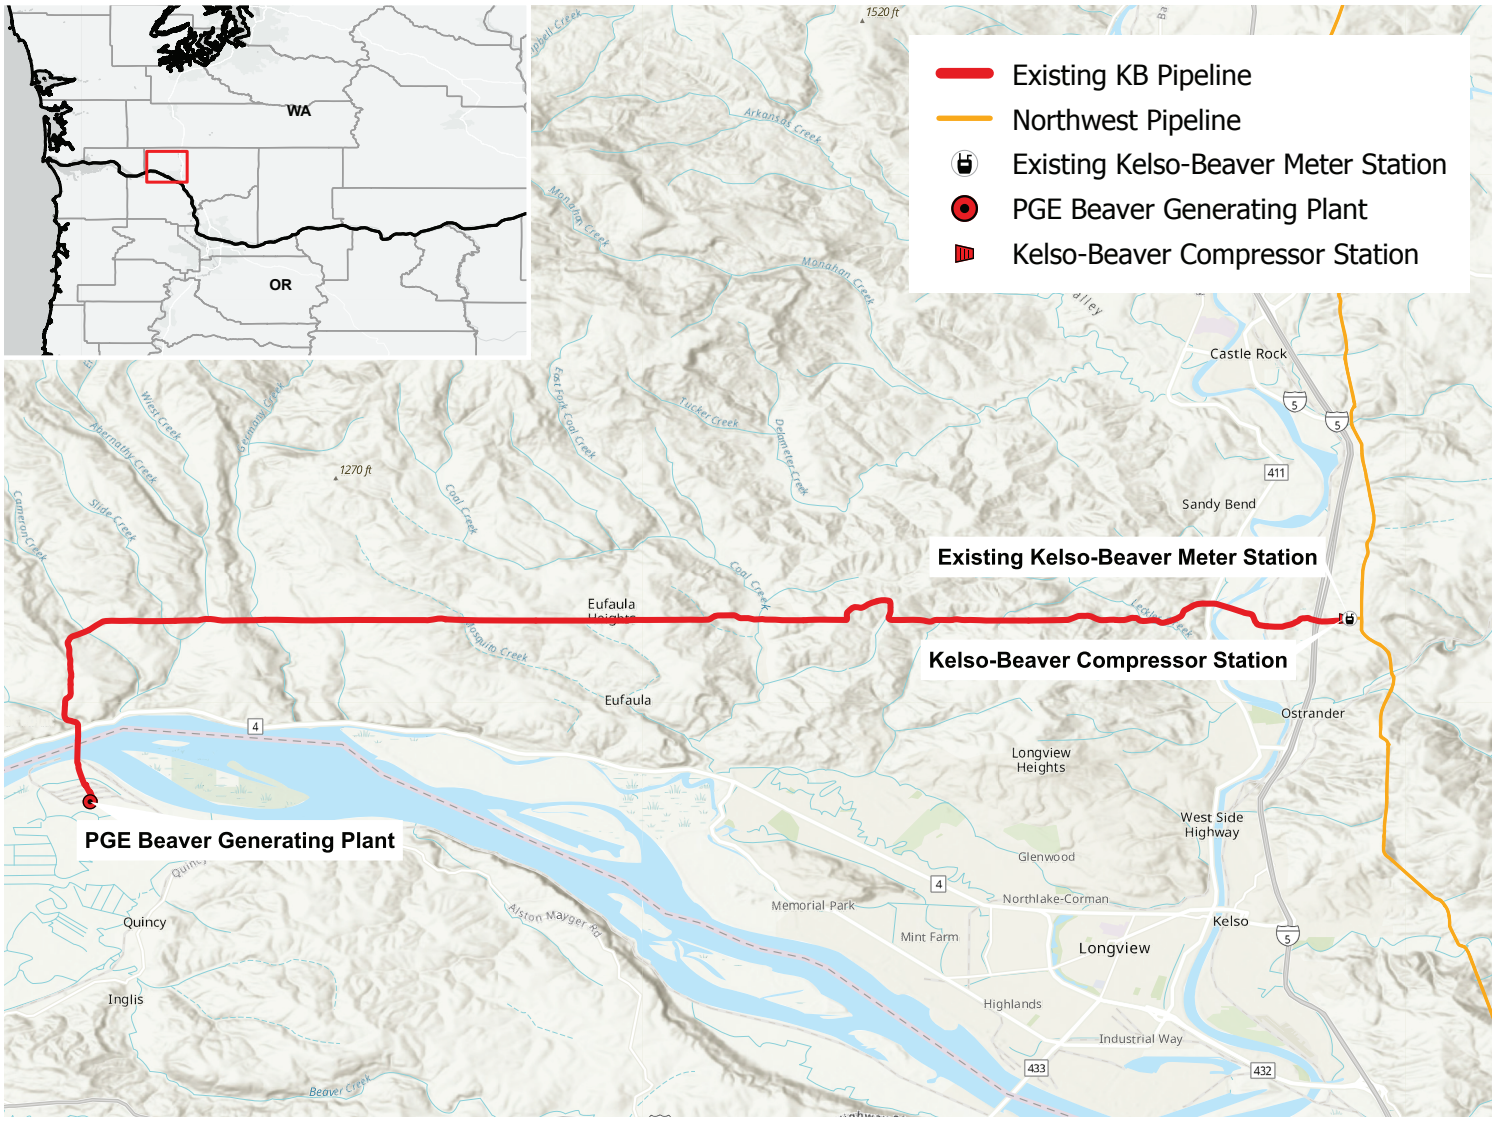

~$2.3M
local labor income

$2.3M+
Cowlitz County tax revenue

Kelso Beaver is designed to strengthen regional energy reliability by connecting existing pipeline infrastructure with natural gas storage and adding flexible, bidirectional service.

Williams® WE MAKE CLEAN ENERGY HAPPEN®

ABOUT WILLIAMS

Williams (NYSE: WMB) is a trusted energy industry leader committed to safely, reliably, and responsibly meeting growing energy demand. We use our infrastructure to deliver one third of the nation's natural gas to where it's needed most, supplying the energy used to heat our homes, cook our food and generate low-carbon electricity. For over a century, we've been driven by a passion for doing things the right way. Today, our team of problem solvers is leading the charge into the clean energy future.
